- Easy to use, intuitive format.
- Can be used to make visual schedules or other types of visual prompts.

Social stories are an important type of visual support often used with children diagnosed with an autism spectrum disorder, Down syndrome or other special need. This social stories found in this app use simple text and descriptive pictures to explain the why and how of different social skills.

Social interactions may be especially difficult for children with an autism spectrum disorder, adhd, or other social delay. Many children, especially those diagnosed with an autism spectrum disorder, Down syndrome and other special need, often fail to pick up on social cues, making learning a social skill especially difficult. Social stories may increase awareness and maintenance of social skills.

Social stories were first defined by Carol Gray in 1991 and are commonly used to break down a task or social situation into small and easy to understand steps, often accompanied by descriptive pictures. Social stories are incredibly easy to implement and are used by many professionals for a wide range of behaviors.
