SCOPE OF WORK

The focus of this initiative is to offer behavior modification and life enrichment services to students within the Township of Union School District during the summer. Our goals are, to create a more positive school culture, reduce violence, and increase engagement among students.

Making the Transition, Inc. (MTT) is a behavioral modification and life enrichment agency working with inner-city youth and young adults. MTT specializes in cognitive awareness, life skills training, vision building and helps participants create a healthier self-concept, while instilling evidence based practices essential for overcoming various social determinants and life barriers. We provide local governments, schools and non-profit partners with the supplemental support necessary for the populations they serve. We are the missing link to providing a holistic approach that strengthens the services and deliverables to ensure all youth have the skills and opportunities necessary to succeed.
