Re: Board Agenda

Date: April 25, 2016

Please place the following on the board agenda.

The committee recommends and I so move that approval be given to The Cerebral Palsy of North Jersey to provide Assistive Technology and or Augmentative and Alternative Communication Evaluations at the rate of \$750 per evaluation and combined Assessment of Assistive Technology and Augmentative and Alternative Communication \$1,200 per evaluation, and to provide training at \$150.00 per hour (Minimum of two hours per sessions) for the 2016-2017 school year. Not to exceed \$4,800.00 (Account #11-000-219-320-01-19)

Serving people with disabilities since 1953

The ATLAS Division

Assistive Technology for Living and Advancing Skills

Schedule of Services

Augmentative and Alternative Communication and Assistive Technology

CPNJ's ATLAS Division specializes in Assistive and Educational Technology and Augmentative and Alternative Communication. We offer an array of assessment and training services.

The ATLAS Team includes Occupational Therapists, Speech and Language Pathologists and Assistive Technology Practitioners with a combined experience of over 50 years.

ATLAS services focuses on supporting individuals with disabilities in achieving communication, educational, vocational and lifestyle goals, as well as supporting the family, peers and professionals surrounding those individuals. **Assistive Technology (AT) services** from CPNJ consider and explore tools to address computer access, educational participation, mobile touch technology and some integrated aspects of mobility and daily living skills. AT can also include Educational Technology (ET), which includes specialized software and hardware designed to support learning across academic subjects and standards. **Augmentative and Alternative Communication (AAC) services** address ways of supporting individuals with complex communication needs in their ability to express themselves using supplemental tools.

Fees through June 2017:

Assessment

\$750

ATLAS team members assess an individual's goals, skills, environment(s) and preferences when considering tools, equipment, strategies and techniques for an Assistive Technology or Augmentative and Alternative Communication system.

Combined Assessment

\$1200

For assessments that address both Assistive Technology and Augmentative and Alternative Communication, more than one practitioner may be warranted to make suggestions for an integrated system of related components and strategies. Combined assessments are also typical for individuals with complex access and/or seating needs.

Consultation

\$400

ATLAS team members can offer suggestions for integrating and maintaining an individual's existing AAC/AT system, maximizing its use throughout the environment and supporting beneficial outcomes for the individual.

Training

\$150/hour

Minimum of two hours per session

As a follow-up to assessment services, ATLAS team members can provide technical and clinical training on topics including hardware, software, system creation and implementation techniques. Training sessions can target users, families, support staff and other professionals.

Tailored Services

Call for Rates

The ATLAS team is able to customize educational, therapeutic and administrative services surrounding AT, ET and AAC. Example include: creating accessible curricular and functional activities; maximizing your existing AT inventory; managing your technology resources effectively; expanding your tools and equipment to accommodate a wider range of users; and other collaborative services to target AT and AAC supports.

Professional Development

Call for Rates

ATLAS team members are available to host and provide on- and off-site family workshops and professional development events on various AAC and AT topics. Rates may vary due to travel time, the length and scope of the presentation, and the number of participants.

Following a request for services, CPNJ requires a funding voucher or letter of intent from the supporting school district or other funding source, securing payment for services. Upon receipt of funding approval, the individual's caregivers will receive an intake packet, which includes a Consent for Services form, a Release of Information form, and an AAC/AT survey. The supporting team will also receive an AAC/AT questionnaire. A CPNJ team member will call to schedule an appointment in the individual's natural environment, typically within four weeks of receiving the completed packet. Upon completion of services, a written report that may include suggestions for equipment, strategies and training is generated and mailed to the funding source.
